

Sondre Gundersrud

Dear Hiring Manager,

My name is Sondre Gundersrud, and I am currently studying Frontend Development at Noroff School of Technology and Digital Media. I am interested in opportunities where I can continue developing my skills in HTML, CSS, JavaScript, responsive design and user-focused web development.

Throughout my studies, I have worked on several projects that have helped me build a stronger understanding of both technical development and visual presentation. These projects include an e-commerce website, a JavaScript-based project and a semester project focused on structure, design and usability.

I enjoy working with clean layouts, responsive design and practical problem solving. I am especially motivated by the process of taking an idea or an existing project and improving it through better structure, clearer design and more thoughtful user experience. I am also continuing to develop my skills in GitHub, documentation and project presentation.

I see myself as someone who is curious, structured and willing to learn. I value clear communication and enjoy working through challenges step by step. My goal is to grow as a frontend developer and contribute to projects where usability, accessibility and good design are important.

Thank you for taking the time to review my portfolio and application. I would appreciate the opportunity to further discuss how my skills, motivation and learning mindset could be valuable in a junior frontend or internship role.

Kind regards,
Sondre Gundersrud
